Energy Systems Author: M. E. El-
Hawary Publisher: CRC Press
Publication Date: 2000-04-18 Number
Of Pages: 384

The growing importance of renewable energy sources, control methods and mechanisms, and system restoration has created a need for a concise, comprehensive **** that covers the concepts associated with electric power and energy systems. Electrical Energy Systems fills that need, providing an up-to-date introduction to this dynamic field. The author begins with a discussion of the modern electric power system, centering on the technical

aspects of power generation,
transmission, distribution
